Universal pneumatic lifting device

DESCRIPTION

The universal pneumatic lifting device allows, where it can be positioned, to make Kariba exposed cisterns penumatable.

With a single code, it is therefore possible to transform a Kariba exposed cistern into a pneumatic cistern with remote control to satisfy anyone who desires greater hygiene or has difficulty using traditional mechanical operating buttons.

To convert a mechanically operated Kariba cistern into a pneumatically remote-controlled cistern, pneumatic controls are required in addition to the pneumatic lifting device.

TECHNICAL NOTES

Articles that are already prepared for the pneumatically controlled system and therefore include the pneumatic lifting device but must be integrated with the pneumatic controls (push button) are:

- KARIBA 2008 code 325104: combined pneu + buttons functionality on cistern
- SUPER KARIBA code 334030: combined pneu + button functionality on cistern
- BIBLO CLASSIC code 336301: only pneu without lid button
- BIBLO UNO code 336430: combined pneu + button functionality
- EURA code 384020: only pneu without lid button
- LUX code 335030: combined pneu + buttons functionality on cistern
- EURO ANTICONDENSA code 384030

COMPATIBILITY

The pneumatic lifting device (Code 400021) is compatible with the following models of Kariba exposed cisterns:

- KARIBA 2008 MONO
- KARIBA 2008 DUO
- SUPER KARIBA MONO
- SUPER KARIBA DUO
- BIBLO UNO
- BIBLO CLASSIC
- BIBLO DUO
- SLIM 116
- LUX
- EURA (excluding chain models - codes 384090 and 384080)
