Pneumatic controls for exposed cisterns

DESCRIPTION

The pneumatic controls must be supplemented by pneumatic lifting devices to enable a mechanically operated Kariba exposed cistern to be converted into a pneumatically remotely controlled cistern. Kariba, always attentive to all needs, offers different types of pneumatic controls: recessed button, exposed button, foot control, ceramic cisterns controls.

COMPATIBILITY

All Kariba exposed cisterns.

RECOMMENDATIONS

It is recommended not to extend the 4x6mm transparent PVC air duct pipe beyond the standard 180cm size as supplied in the package.
