Inspection plates for pneu adaptation with remote pedal

DESCRIPTION

Kariba's pneumatic rinsing systems can improve the everyday experience of anyone who wants better hygiene or has difficulty using traditional mechanical operating buttons.

Thanks to the air-operated foot control technology, there is no need to touch the plate with your hands to start the rinse, which makes the bathroom even more hygienic.

Pneumatic kits make it possible to convert Kariba 6E and 9.0 concealed cisterns into cisterns with pneumatic remote control.

Pneumatic conversion kits include the metal blind plate, foot control and lifting unit. The conversion does not require the replacement of any components inside the cistern.
